

AXIOM NEXUS LLC

Business Plan, Product Overview & KYB Compliance Package

Prepared for Submission to Bridge Compliance Team

Legal Name:	Axiom Nexus LLC
Formation:	December 26, 2025 Mississippi
Entity ID:	1522557
EIN:	41-5188895
Management:	Manager Managed
Industry:	Computer Systems Design and Related Services
NAICS:	541511, 541512
Website:	https://axiomprotocol.app

Section 1 — Executive Summary

Axiom Nexus LLC is a financial technology and blockchain software infrastructure company. The company develops compliance-focused digital asset systems, smart contract tools, tokenized real-world asset infrastructure, treasury management technology, and payment rail integration tooling.

Axiom Nexus LLC is currently an early-stage software and technology company focused on product development, technical architecture, vendor onboarding, compliance preparation, and internal business operations. No regulated financial products are currently offered to the public.

Section 2 — Business Model

Axiom Nexus LLC's business model is based on developing software infrastructure, dashboards, smart contract systems, treasury management tools, compliance tooling, and platform technology for digital finance and tokenized real-world asset workflows.

The company does not currently operate as, and does not describe itself as, a bank, money transmitter, investment adviser, broker-dealer, custodian, crypto brokerage, OTC desk, or payment processor.

Section 3 — Products and Platform Modules

■ Axiom Protocol Platform

A modular blockchain software infrastructure platform providing on-chain identity, governance, and asset-management tooling for institutional and developer use.

■ Compliance-Focused Digital Asset Infrastructure

Software systems designed to support KYC/KYB workflows, audit trails, and regulatory-aligned data structures for digital asset environments.

■ Smart Contract Tools

ERC-20, ERC-3643, and ERC-7726 compatible automated control layer tooling for on-chain identity verification, token issuance, and oracle-driven pricing.

■ Treasury Management Dashboard

An internal dashboard providing real-time visibility into on-chain treasury balances, reserve compositions, and multi-party authorization activity.

■ Reserve and Solvency Reporting Tools

Oracle-driven reserve attestation dashboards producing readable solvency reports suitable for compliance review and internal governance.

■ Payment Rail Integration Tooling

Software adapters connecting internal treasury operations to Stellar SEP and EVM-compatible payment rails for business operational purposes.

■ Tokenized Real-World Asset Platform Infrastructure

A framework for onboarding physical asset data onto blockchain-based registries, including land and commodity reference instruments.

■ Business Dashboards and Reporting Systems

Operations dashboards providing capital performance intelligence, audit logging, and business reporting functions for internal use.

■ On-Chain Identity and Governance Tools

Identity registry and governance token infrastructure enabling permissioned access control and participant management within the platform.

Section 4 — Current Development Stage

The company is in early-stage development and onboarding.

Axiom Nexus LLC is currently building software, technical infrastructure, compliance workflows, dashboards, and platform interfaces.

No regulated financial products are currently offered to the public.

Section 5 — Account Usage

The Bridge account will be used **only** for internal business treasury activity, owner-funded operating expenses, software development costs, infrastructure expenses, vendor payments, compliance preparation, platform setup, and general business operations.

The account will **not** be used to:

- Transmit customer funds
- Custody customer assets
- Hold client escrow funds
- Process third-party payments
- Operate a virtual currency brokerage
- Operate an OTC trading desk
- Provide investment advisory services

Section 6 — Source of Funds

The company is currently funded by owner's capital contributed by the founder/member for formation, software development, infrastructure, compliance preparation, and operating expenses.

Funds are not derived from customer deposits, customer custody, money transmission activity, public investment offerings, or third-party client funds.

Section 7 — Compliance Clarification

Axiom Nexus LLC does not currently custody customer funds, transmit customer funds, operate as a bank, operate as a licensed money transmitter, provide investment advisory services, operate a virtual currency brokerage or OTC trading desk, hold client escrow funds, or provide regulated financial products to the public.

Any regulated activity, if launched in the future, will be conducted only after applicable legal review, required registrations or exemptions, approved compliance procedures, and/or the use of licensed third-party providers.

Section 8 — Product Screenshots and Platform Page Directory

All screenshots submitted with this package were captured from the live platform at <https://axiomprotocol.app>. The table below lists every page included in the screenshot set, its full URL, and a brief description of the module or function it represents. Individual wireframe preview images are provided in the accompanying *bridge_product_screenshots/* folder.

Platform Identity	URL	Description
